Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claims 13-20 are objected to because of the following informalities: In claim 10 line 5, "the planting unit" lacks proper antecedent basis. In claim 13 line 1, it appears that "a" should be inserted before "vertical". In claim 13 line 2, it appears that "linkage" should be inserted after "first". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 10-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Foley (5,163,518).

Foley discloses a seed planting assembly including a tool bar 12, a planting unit 16 including a planting unit frame wherein the planting unit frame carries a seed trench opening assembly 20, a seed delivery assembly, a seed trench closing assembly, and a mounting assembly pivotally linking the planting unit frame with the tool bar wherein the mounting assembly permits the planting unit to raise and lower with respect to the tool bar, with a vertical positioner 36 including a first linkage 40 connected to the mounting assembly and a second linkage connected to the first linkage at a positioner joint (not

numbered but shown in figure 4), wherein the second linkage can be actuated to raise the planting unit. Concerning claim 7, the aperture comprising the pinned connection shown in figure 4 is considered to meet the limitations of a slot, with the actuating lever considered the rod associated with cylinder 50. Concerning the method claims, given the structure disclosed in Foley, the claimed method steps would inherently be performed.

Allowable Subject Matter

Claims 2-6,8,9,19,20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
